

Matchstiq™ Z3u

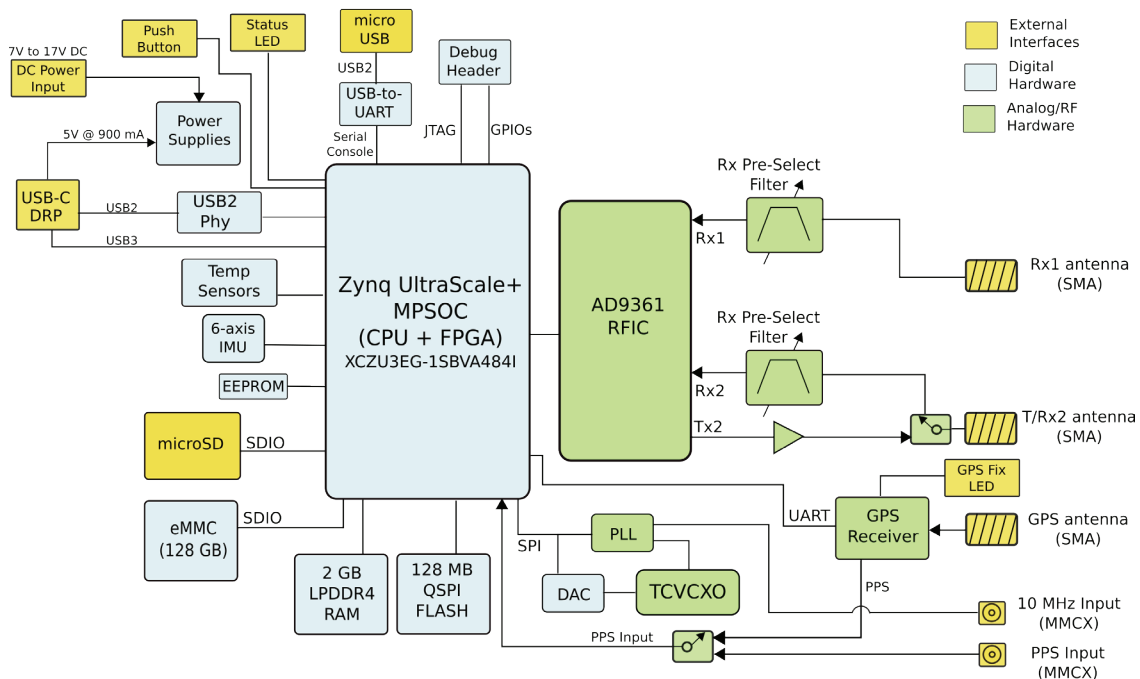

Next Generation Low SWaP Fully Integrated Software – Defined Radio (SDR) Platform

RADICALLY SMALL, INDUSTRIAL – GRADE RF SIGNAL PROCESSING PLATFORM

REDUCE RISK AND ACCELERATE DEVELOPMENT OF MISSION CRITICAL RF TRANSCEIVER SOLUTIONS

The Matchstiq Z3u is a field-ready, complete software-defined radio (SDR) platform designed to deliver a fully integrated RF transceiver plus signal processing solution in the smallest possible form factor. Measuring just 3.64" x 2.74" x 0.75" and weighing 5.6 ounces, the Matchstiq Z3u is ideal for on-the-go signal processing applications. An integrated magnetic mount allows the platform to attach to a cell phone or other portable device, deriving power and providing communications through a single USB-C port. As a completely stand-alone platform, Matchstiq Z3u can execute signal processing applications locally on the AMD® Zynq® Ultrascale+ System on Chip (SoC), or interface to a host platform over USB 3.0 to execute applications on the host.
